LEEPEAPP INVENTORY MANAGEMENT SYSTEM

LeepeApp Inventory Management System is a modern business app designed to track inventory levels, orders, and deliveries. It is a centralized records of all the company's assets and stocked products where it is used to avoid product overstock and stockout. It is also used as a tool for organizing and monitoring inventory data that before was generally stored in hard-copy form or in spreadsheets. LeepeApp Inventory Management System can also be used in the manufacturing industry to create a work order, bill of materials and other production-related documents.

BENEFITS OF AUTOMATION
